Black & White  
Digital Film Imager

The UP-D72XR is a compact, high speed, black and white digital film imager designed for use with diagnostic imaging systems, such as mobile c-arm units, ultrasound systems and cardiac cath labs. Supporting both 8 x 10 inch Blue Thermal Film and Thermal Printing Paper, this high resolution printer offers photo-like film and prints with 512 levels of gray. By using its USB connectivity and compatible printer driver software, it can be used conveniently within a generic Microsoft Windows® environment. Additionally, the printer can be used for reference image printing by utilizing the FilmLink feature to connect it to the Sony FilmStation™ imager. This flexible connectivity delivers the ability to produce simultaneous reference prints. With a variety of other convenient features packed into its compact body, the UP-D72XR is ideal for use in a wide range of medical applications.

UP-D72XR

- Superb image quality is due to advanced Sony direct thermal printing technology and high resolution of approximately 300 dpi
- Fast 40 second print time is ideal for time-critical medical applications
- Supports high speed data interface with USB and parallel (IEEE 1284) connections
- Compact and lightweight design makes it easily integrated into mobile c-arm units and ultrasound systems
- Secure locking system keeps paper tray locked during movement
- LCD display, controls and media loading are all located on the front panel providing simple operation
- Convenient media window enables operator to see when media needs reloading
- Automatic gamma curve adjustment: printer senses media type (film or paper) and applies appropriate gamma curve to reproduce precise grayscale
- Has worldwide power supply
